

*We are looking for Sr SOFTWARE ENGINEER*

## **RESPONSIBILITIES**

- Create software that is reliable, maintainable, secure, and creates a framework for innovative solutions
- Tackle complex problems and identify whether they require innovations, decisions, or routine tasks
- Work on a variety of projects including multiple Azure services as well as both relational and non-relational data sources
- Work in a full-stack environment

## **QUALIFICATIONS**

- 4+ years of software development experience
- Experience designing and implementing multitenant SaaS solutions
- Proficiency with JavaScript, HTML5, CSS
- Familiar with ASP.NET MVC
- Understanding of REST API structure and ASP.NET WebAPI
- Understanding of Application Security (encryption, secure messaging)
- Data Access ORM (Dapper and Entity Framework)
- Knowledge of Azure Services (Web Apps, Cosmos, Web Jobs)
- Relational databases (SQL Server)
- Knowledge of current development tools and frameworks used in front-end development (AngularJS, Bootstrap)
- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system
- Agile experience is a must
- Professional, precise communication skills
